

Intersection Safety - A Manual for Local Rural Road Owners

A new resource from FHWA is now available for local rural road owners: Intersection Safety - A Manual for Local Rural Road Owners.

The resource provides information on effectively identifying intersection safety issues in local areas, choosing the countermeasures that address them, and evaluating the benefits of those treatments. It is geared toward local road managers and other practitioners with responsibility for operating and maintaining their roads. It offers information on the procedures and processes to improve the safety of local rural unsignalized intersections and to reduce the potential for future crashes.
